

**OUR FULLY INTEGRATED INSERTING SOLUTION GIVES YOU A STRAIGHT PATH TO BUSINESS GROWTH**

**Document Scanning**

The SI5200 / SI5400 scans both barcodes and Optical Mark Recognition (OMR) codes to control

what is inserted into each envelope.

Allows you to add inserts selectively for targeted marketing campaigns. Run jobs with a variable number of pages, eliminating costly and error-prone manual sorting.

**Document Processing**

Verify and update address information, speed delivery and realize significant postal discounts by correcting addresses, adding ZIP+4® barcodes and presorting.

**Process Verification**

The system detects missing, duplicated, or out-of-order pages and assists the operator in correcting the problem, including regeneration of missing or damaged pieces. It also verifies that no items in a mail run were lost or processed incorrectly.

**SECAP® SI5200 / SI5400 TECHNICAL SPECIFICATIONS**

Material	Size	Feeder Capacity
Sheets:	Up to 8.5" x 14"	Up to 350
Inserts (min/max):	5" x 2.83" to 9.84" x 6"	Up to 350
Envelopes (min/max):	6.37" x 3.5" to 10.5" x 6.5"	Up to 500
Flat Envelopes:	Up to 10.5" x 13"	Up to 100
Speed:	SI5400: Up to 5,400	
(mail pieces/hr.)	SI5200: Up to 4,300	
Fold Types:	C,Z, Single, Double	
Folder Capacity:	8 Sheet Maximum	
Flat Envelope Inserting:	25 Sheet Maximum	
Sealing Capacity:	Up to 8,000 letters before reloading	

**SYSTEM OPTIONS:**

**High Capacity Sheet Feeder:** 1,000 sheet capacity/tray, 2 trays/module (up to 2 modules per system).

**High Speed Envelope Feeder:** loads "on the fly", holds up to 500 envelopes on the SI5400, 250 on the SI5200.

**Vertical Power Stacker:** The VPS keeps mail pieces in original order and allows continuous "on the fly" unloading for optimum productivity. Up to 21" capacity (equal to one standard USPS mail tray). If VPS is not added, drop stacker comes standard.

**Optical Mark Recognition (OMR):** Generates OMR marks to gain control of each piece of mail. Helps the right contents go into the right envelope and get to the right recipient. Generates code 3 of 9 and interleaved 2 of 5 barcode OMR.

**Inverter Kit:** For applications where the address bearing portion of the document is on the bottom panel. This kit upgrades the folder to support tri-folded middle and bottom address applications without requiring custom, bottom-flap envelopes.

**Exit Transport:** 18" in length it extends the path of the letter envelope while maintaining flat envelope functionality. (Required with the vertical power stacker on the SI5400.)

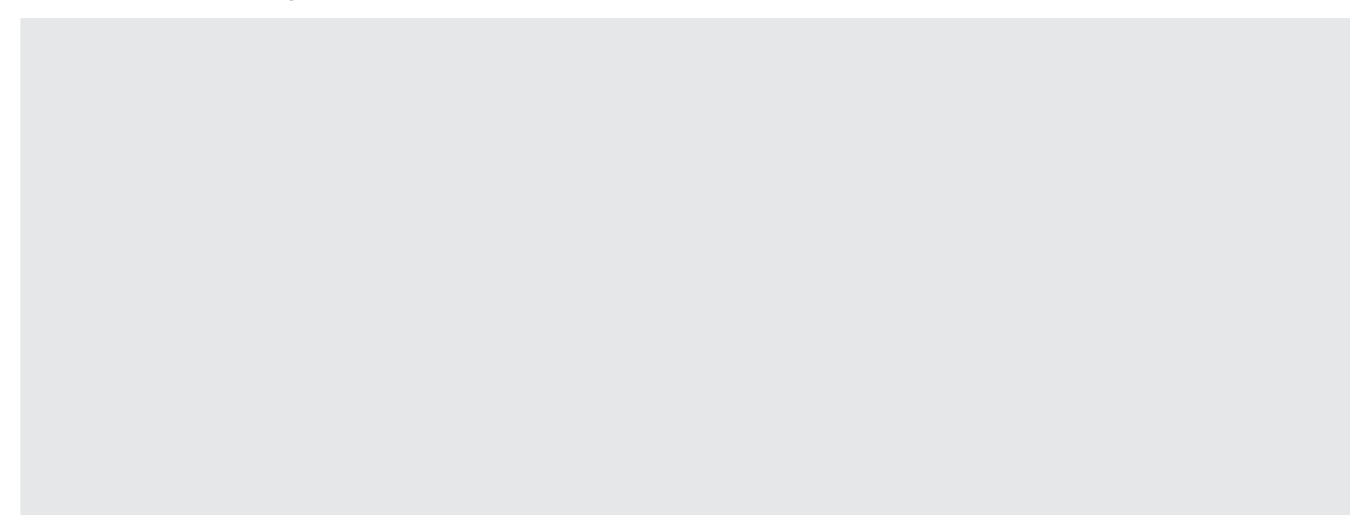

**Work Base:** Mount your system on a 60" or 90" table. Height adjusts to 30", 18" or 30" extensions available.

Specifications subject to change without notice. Speeds may vary depending on model, configuration, media size and application. Extra table extensions may be necessary depending on configuration.

**INTEGRATED SOLUTIONS FOR FOLDING, INSERTING AND MAIL FLOW PRODUCTIVITY**

Mail is your direct link to your customers. You want to make the most of it by harnessing the full power of mail. Add personalized inserts to your transactional mail. Use sophisticated direct marketing campaigns to target specific customer segments. Maybe add newsletters to the mix to keep both customers and employees connected. Now, all you need is a system that can handle it.

There's no better starting point than the SI5200 / SI5400 Series. Designed to handle a wide range of mailings quickly and accurately, even when you're doing complex applications such as multi-page statements, promotional mail with multiple inserts or credit card mailings, the SI5200 / SI5400 does it all. They accept envelopes and flats in a wide range of sizes. You can even do multiple folded sets in one envelope and change the folds from set to set.

**Easily fold and insert...**

- bills
  - checks
  - catalogs
  - paychecks
  - inserts
  - statements
  - promotions
  - brochures
  - newsletters
  - announcements
  - purchase orders
  - direct mail campaigns
  - product updates
  - benefit information
  - annual reports
- and much more!

Not only does the SI5200 / SI5400 make your customer communications more efficient, it's versatile enough to serve many different departments--marketing, accounting, employee communications--with different mailing needs that sometimes overlap. Designed to keep running and running, both systems eliminate costly manual sorting, folding and inserting making your organization more productive.

These machines offer superior flexibility, versatility and productivity making them suitable for quick printers, commercial printers, inplant printers, mid to large size organizations and mailing and fulfillment houses wanting to get a quick return on investment.

**DETAILS - CHOOSE YOUR CONFIGURATION**

- 1. High Capacity Sheet Feeder Modules**  
Two trays-each hold 1000 sheets. Up to two modules per system.
- 2. Flexible Tower Feeders**  
Available with two or four interchangeable trays for sheets, envelopes and inserts of various sizes.
- 3. Central Graphic Control Panel**  
As easy to use as a copier. Advanced user interface makes programming and changing jobs easy and intuitive. Program and save up to 24 jobs.
- 4. Versatile**  
Handles standard and flat envelopes. No need for a second machine. Run jobs with a variable number of pages eliminating costly manual sorting.
- 5. Inverter Kit**  
Supports tri-folded middle and bottom address applications without requiring bottom-flap or custom envelopes. Installs on top of the folding module.

- 6. High Capacity Envelope Feeder For The SI5400**  
Loads "on the fly", while the system is running. Holds up to 500 envelopes for increased productivity.
- 7. Vertical Power Stacker**  
Neatly stacks mail pieces and keeps them in the same order as loaded. It allows unloading "on the fly" maintaining productivity and avoiding interruptions.
- 8. Exit Transport For The SI5400**  
Extends the path of the letter envelope exit beyond the distance needed for stacking flats. It also provides optimum operator access to the high capacity envelope feeder.
- 9. Customized Work Bases**  
Ergonomically friendly with convenient storage. Electric, height adjustable to 30".

Ask your mailing specialist about adding the optional components 1, 5-9 to suit your individual needs.

SI5400-4H shown with optional add-ons: inverter kit, vertical power stacker, exit transport and table.

**FAST, FLEXIBLE AND EASY TO USE**

At up to 5,400 mail pieces an hour, the SI5400 is the fastest system of its size. Adding stackers and high capacity sheet and envelope feeders provide optimum flexibility and productivity. And there's no special operator required.

**MAKES COMPLEX JOBS EASY**

Advanced user interface shows where materials go and how to load them saving significant programming time.

SwiftStart™ senses how to run a job based on your materials.

Trial piece allows a test job run to verify settings without wasting time and materials.

Clear deck makes it convenient and easy to clear the paper path.

**THE SI5200 / SI5400 SYSTEMS CAN BE CONFIGURED TO MEET YOUR SPECIFIC NEEDS.**

Ask about these and other popular configurations:

**SI5200-4**  
Four Feeder Tower  
Up to 4,300 pieces/hr.  
Max Dimensions: 31"H x 75"L x 22.8"D  
Weight: 326.5 lbs.

**SI5400-4**  
Four Feeder Tower & High Capacity Envelope Feeder  
Up to 5,400 pieces/hr.  
Max Dimensions: 31"H x 89"L x 22.8"D  
Weight: 349 lbs.
